AUGUST BUILDING OPERATIONS

Returns of proposed building operations from plans filed for August throughout the country show a decided increase over the same period one year ago.

The total increase from the figures given below is $6,126,039, or about 12½%. Throughout the Eastern States there was a gain of about 18½%, in the South about 18%, in the Central States about 20%, and a loss of about 35% throughout the West. This loss is accounted for by the large amount of building which was done at the Expositions a year ago.

For the past 8 months building has shown a gain throughout the Eastern States of about $2,500,000 and compared with July of this year has increased about $3,000,000, or 11%, which is an improvement for this season of the year.

Below is given a table of contemplated building operations from representative cities throughout the country.
